I can call you at 2 PM to save you the toll although that sounds a bit dated these days! Your number?

No worries, yes. Is a phone interview okay? With our hectic schedules, I think that would be best. 2pm works great on Monday, should I call your office or another number?

Oh I am so sorry. It has been insane with work but that's not a good excuse. Can we schedule something next week? Monday afternoon anytime is good. Please confirm by email if 2 PM is good.

Hi Dave

About two weeks ago, I left a voicemail on your phone to schedule an interview but received no return call so I was wondering if perhaps we can schedule a time by email?

Mr. Kluesner,

I am a PhD student at NJIT in Newark. I am currently writing several papers concerning Superfund sites in this area, all research that may lead to a dissertation. I am highly interested in studying the Diamond Alkali Superfund site and I understand you are the community coordinator for this project. I have read nearly all of the documents, legal briefs, and newspaper articles yet I would like a clearer and more comprehensive picture about the future of the site as related to the larger city and any information that is unavailable online, such as the major players, legal representatives and other parties involved in this scene. Would you be willing to grant me an interview either online, by phone, or in person? If not, could you put me in contact with someone possibly willing to do so?

Thank you,

Stephanie M. Dedovitch
